Logging: up to 40 inputs, remotely configurable.

Alarm any input with email or telephone alerts.

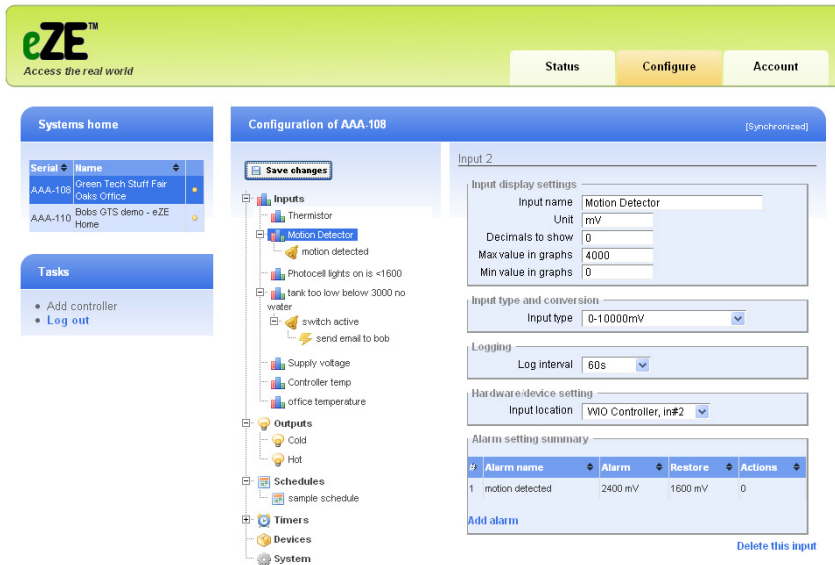

Fast: real time remote analysis and control.

Graphical tools included.

Direct download to Excel or Access

The eZEio Controller

The configuration screen looks and acts like sophisticated application software, but it is really only a standard browser.

Easy to install, program and use

Works with existing systems

Simple, secure and safe

Internet, email, smartphone

Logging and alarms

No special firewall or network configuration

Zero configuration required

Low power, low cost, long life
